RAMU ANANDAKRISHNAN

Assistant Professor, Biomedical Sciences
Director of Biostatistics
Edward Via College of Osteopathic Medicine (VCOM), Blacksburg, VA

ramu@vt.edu

131 Spring Dr.
Newport, VA 24128

PERSONAL STATEMENT

In 2006, I left a successful career as a senior executive in the Information Technology (IT) industry, to pursue a lifelong interest in science, with the goal of making a more significant contribution to society. With a diverse nontraditional background spanning executive management, engineering, computer science, biophysics, systems biology and cancer genomics, I bring unique interdisciplinary perspectives and approaches to scientific problems and projects. I am currently investigating a novel mechanism associated with the etiology of cancer – clonal hematopoietic mutations in tumor infiltrating immune cells. In addition to machine learning and bioinformatics approaches, I am now conducting *in vitro* experiments, including CRISPR/Cas9 gene editing of cell lines, to validate this mechanism. This work is being done in my Biosafety Level 2 wet lab, made possible by the generous support of Edward Via College of Osteopathic Medicine (VCOM), and assistance from my colleagues and students.

EDUCATION

PhD Virginia Tech, Blacksburg, VA   December 2011
Computer Science
Dissertation: "Speeding up electrostatic computations for molecular dynamics"
Committee: Alexey Onufriev (chair), David Bevan, Jianhua Xing, Adrian Sandu, Yang Cao

MBA University of Maryland, College Park, MD   May 1979
Finance

BS Indian Institute of Technology, Kanpur, India   May 1977
Mechanical Engineering

HONORS AND AWARDS

Top 100 Scientific Reports cancer papers   2019

Featured Article, Nucleic Acids Research   2012

Davenport Fellowship, Virginia Tech   2011

ACS/CCG Student Research Excellence Award 2011

Computer Sciences Corp. Presidents Excellence Award 1995

GRANTS

VCOM Research Eureka Accelerator Program (REAP) 2023-2024
Title: "Preliminary validation of a blood-based screening assay for lung cancer"
Role: PI
Amount: $40,000

VCOM Research Eureka Accelerator Program (REAP) 2022-2023
Title: "Confirming immunosuppressive clonal hematopoietic (CH) mutations in tumor infiltrating immunocytes (TII) from lung adenocarcinoma (LUAD) samples"
Role: PI
Amount: $40,000

VCOM Research Eureka Accelerator Program (REAP) 2020-2021
Title: "Investigate the effect of a rare mutation in Fetuin-B on the progression of Acute Myeloid Leukemia"
Role: PI
Amount: $57,000

VCOM Research Eureka Accelerator Program (REAP) 2019-2020
Title: "Investigate the role of OR2T7, a novel prognostic marker and potential therapeutic target, in the progression of glioblastoma"
Role: PI
Amount: $53,000

VCOM Research Eureka Accelerator Program (REAP) 2017-2018
Title: "Determine the number of germline and somatic mutations (hits) required to tumorigenesis in childhood cancers, and understand their relative importance"
Role: PI
Amount: $41,000

RESEARCH EXPERIENCE

Edward Via College of Osteopathic Medicine, Blacksburg, VA 2016-present
Assistant Professor, Biomedical Sciences

University of Pittsburgh, Pittsburgh, PA 2015 to 2016
Postdoctoral Associate, Zuckerman Lab

Virginia Tech, Blacksburg, VA 2012 to 2015
Postdoctoral Associate, Onufriev Lab

Virginia Tech, Blacksburg, VA   2006 to 2012
Graduate Research Assistant, Onufriev Lab

TEACHING EXPERIENCE

Edward Via College of Osteopathic Medicine, Blacksburg, VA   2021-present
Assistant Professor, Biomedical Sciences
- Course director for MED 8700: Research and Scholarly Activity rotation for 3rd and 4th year medical students (~1000 students across 4 campuses). Designed research project or clinical case study requirements and curriculum. Worked with faculty to identify projects/cases and mentors for students.
- MED 7314: Preventive Medicine, Epidemiology, and Public Health: Foundations in Research and Biostatistics (~170 students). Lectures in Research and Biostatistics.
- BMS 5920: Research and Biostatistics lectures 1-9 for the Master of Arts in Biomedical Sciences program (~100 students).
- BMS 5312: Human Genetics lectures 1-2 and 15-17 for the Master of Arts in Biomedical Sciences program (~100 students). The lectures covered human chromosome and cancer genetics
- BMS 5104: Biochemistry lectures 6-7 for the Master of Arts in Biomedical Sciences (~100 students). The lectures covered amino acids and protein structure-function relationship

Virginia Tech, Blacksburg, VA   Spring 2013, 2014, 2015
Guest Lecturer, Department of Computer Science
- CS4414 Issus in scientific computing.
- CS2104 Introduction to problem solving in CS.
- Delivered a series of three lectures on graphical processing unit (GPU) programming, developed and graded homework assignments and exams, tutored students.

Virginia Tech, Blacksburg, VA   August 2010 to December 2010
Teaching Assistant, Department of Computer Science
- CS4114 Formal Languages. Gave three lectures, developed and graded homework assignments and exams, tutored students.

INDUSTRY EXPERIENCE

Accenture, Boston, MA   1997 - 2006
Partner, Financial Services division
Managed large (100 – 200 person, $25 – $40 million) software engineering projects for Bank of America and Sallie Mae. Projects included the development, maintenance and operation of application systems for loan origination and servicing, online banking, investment and consumer banking, accounting, and payroll.

Computer Sciences Corp, Greenbelt, MD   1988 - 1997
Director of IT, Government Services division
    Managed a 40 person IT department with a $5 million annual budget. Developed and supported insurance coverage and claims systems for automobile and flood insurance.

SYCOM, Inc., Reston, VA   1987 - 1988
Team Lead, Government Services division
    Developed and implemented the Toxic Release Inventory System, the Chemicals in Commerce System, the Automated Document Control Register, and the Facilities Index System for the EPA.

META Systems, McLean, VA   1982 - 1987
Partner, Database System
    Developed and implemented the Maritime Telephone/Telex Call Billing and other administrative support systems for telecommunication companies.

US Chamber of Commerce, Bethesda, MD   1979 - 1982
Systems Programmer, IT Services
    Installed, monitored and tuned the IBM MVS Operating System, TCAM teleprocessing system, ADABAS DBMS, and other system software, on an IBM 360 mainframe computer.
