

Improving Growth Curves

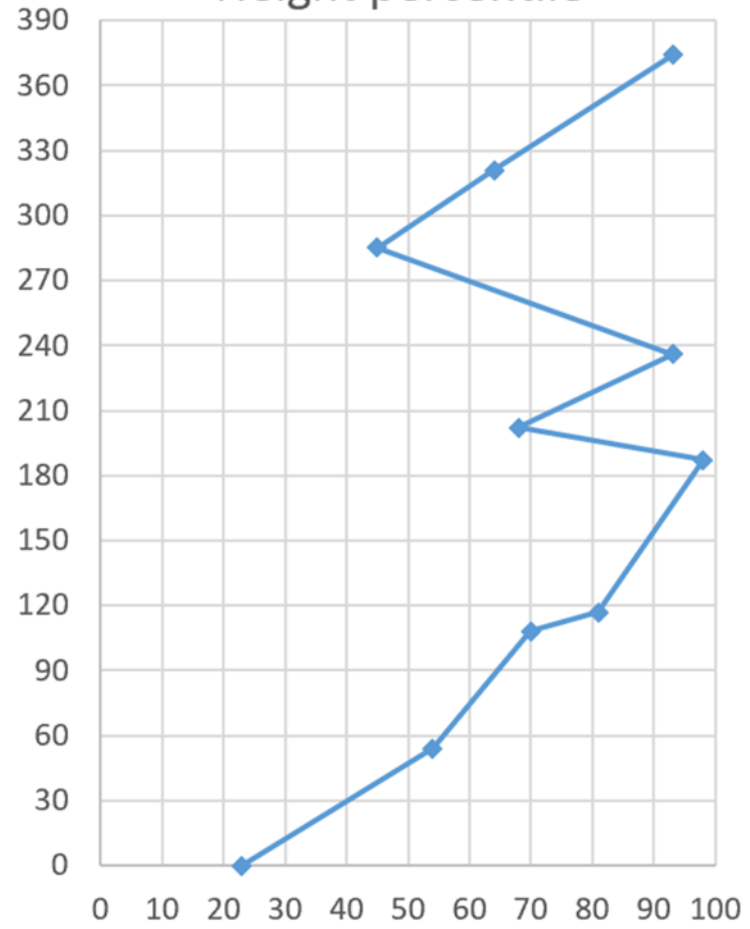

JuliSu Dimucci-Ward Ph.D. and Steven Enkemann Ph.D.

Height percentile

Ongoing project:

- **Train medical students how to measure babies and interpret growth charts.**
- **Measure babies once a month for the first 2 years of life.**
- **Determine whether parents can accommodate the extra measurements and if improved measurement care reduces the scatter in growth curves.**

Can we figure out ways to get more measurements of infants in the first 6 months of life?
