I. Rotation Description
Students will learn to elicit a complete problem-focused ENT history, perform a complete head and neck examination, apply laboratory information and testing to specific otolaryngologic conditions.

II. Rotation Goals
a. Elicit a focused history including information regarding:
   i. Nasal and sinus symptoms
   ii. Smoking/tobacco use
   iii. Alcohol use
   iv. Voice/laryngeal symptoms
   v. Speech difficulty
   vi. Ear Pain
   vii. Hearing loss
   viii. Jaw pain
   ix. Altered/diminished taste or smell
   x. Neck Mass

b. Complete the following examinations/procedures:
   i. Head and neck exam
ii. Cranial nerve  
iii. Oral cancer screening  
iv. Tympanic membrane observation and insufflations  
v. Nasal and oro-pharyngeal  
vi. Anterior nasal packing  

c. Diagnose, evaluate and describe the management of the following conditions:  
   i. Otitis externa/otitis media (acute and chronic)  
   ii. Cholesteatoma  
   iii. Hearing loss  
   iv. Laryngitis  
   v. Sinusitis (acute and chronic)  
   vi. Allergic rhinitis  
   vii. Vertigo  
   viii. Neck adenopathy/neck masses  

d. Interpret tests, including:  
   i. Sinus x-rays  
   ii. Audiology reports  
   iii. Speech therapy reports  
   iv. RAST  
   v. Skin test  
   vi. Allergy testing  
   vii. Indirect laryngoscopy  

e. Demonstrate understanding of the following procedures:  
   i. Laryngoscopy  
   ii. Nasopharyngoscopy  

III. Rotation Design  
The majority of the Otolaryngology rotation occurs in the office and surgical center or hospital OR.  

IV. Credits  
4 week course = 4 credit hours  
2 week course=2 credit hours  

V. Suggested Textbook and References  
b. Handbook of Otolaryngology: Head and Neck Surgery; D. Goldberg; Thieme; 2010  

VI. Course Grading/Requirements for Successful Completion of the Otolaryngology Rotation  
a. Attendance according to VCOM and preceptor requirements  
b. Preceptor Evaluation at end-of-rotation  

Grading policies, academic progress, and graduation requirements may be found in the College Catalog and Student Handbook at: http://www.vcom.vt.edu/catalog/.
VII. Clinical Performance Objectives

The end-of-rotation evaluation for this rotation will be completed by your preceptor and is based on clinical core competencies. These core competencies reflect student performance in 6 key areas: communication, problem solving, clinical skills, medical knowledge, osteopathic medicine and professional and ethical considerations. Your end-of-rotation evaluation from your preceptor will be based directly on your performance in these 6 core competencies as described below.

a. Communication - the student should demonstrate the following clinical communication skills:
   1. Effective listening to patient, family, peers, and healthcare team
   2. Demonstrates compassion and respect in patient communications
   3. Effective investigation of chief complaint, medical and psychosocial history specific to the rotation
   4. Considers whole patient: social, spiritual & cultural concerns
   5. Efficiently prioritizes essential from non-essential information
   6. Assures patient understands instructions, consents & medications
   7. Presents cases in an accurate, concise, well organized manner

b. Problem Solving – the student should demonstrate the following problem solving skills:
   1. Identify important questions and separate data in organized fashion organizing positives & negatives
   2. Discern major from minor patient problems
   3. Formulate a differential while identifying the most common diagnoses
   4. Identify indications for & apply findings from the most common radiographic and diagnostic tests
   5. Identify correct management plan considering contraindications & interactions

c. Clinical Skills - the student should demonstrate the following problem solving skills:
   1. Assesses vital signs & triage patient according to degree of illness
   2. Perform good auscultory, palpatory & visual skills
   3. Perform a thorough physical exam pertinent to the rotation

d. Osteopathic Manipulative Medicine - the student should demonstrate the following skills in regards to osteopathic manipulative medicine:
   1. Apply osteopathic manipulative medicine successfully when appropriate
   2. Perform and document a thorough musculoskeletal exam
   3. Utilize palpatory skills to accurately discern physical changes that occur with various clinical disorders
   4. Apply osteopathic manipulative treatments successfully

e. Medical Knowledge – the student should demonstrate the following in regards to medical knowledge:
   1. Identify & correlate anatomy, pathology and pathophysiology related to most disease processes
   2. Demonstrate characteristics of a self-motivated learner including demonstrating interest and enthusiasm about patient cases and research of the literature
   3. Are thorough & knowledgeable in researching evidence based literature
   4. Actively seek feedback from preceptor on areas for improvement
   5. Correlate symptoms & signs with most common diseases
f. Professional and Ethical Behaviors - the student should demonstrate the following professional and ethical behaviors and skills:
   1. Is dutiful, arrives on time & stays until all tasks are complete
   2. Consistently follows through on patient care responsibilities
   3. Accepts & readily responds to feedback, is not resistant to advice
   4. Assures professionalism in relationships with patients, staff, & peers
   5. Displays integrity & honesty in medical ability and documentation
   6. Acknowledges errors, seeks to correct errors appropriately
   7. Is well prepared for and seeks to provide high quality patient care
   8. Identifies the importance to care for underserved populations in a non-judgmental & altruistic manner

g. Osteopathic Manipulative Medicine Components
   Students must be familiar with the OMM didactic and workshop requirements for their OMS-4 year as described in the Osteopathic Manipulative Medicine website.
