Our Mission

To extend the compassionate ministry of Jesus by improving the health and well-being of our communities and bring good help to those in need, especially people who are poor, dying and underserved.

Our Vision

Inspired by God's hope for the world, we will be a ministry where associates want to work, clinicians want to practice, people seek wellness and communities thrive.

History of Bon Secours

The Sisters of Bon Secours were founded in 1824 to respond to the needs of those who were sick and dying in Paris by providing health care to them in their homes. Through their care, they believed that they were bringing God's healing, compassion and liberation to those in need by helping to alleviate their suffering and bringing a message of hope and assurance that there is a God who loves them.

Awards and Recognitions

At St. Francis, we always strive to be the best at what we do. Along the way, we have been recognized by several national organizations for our quality, efficiency, and technology. In addition, many of our programs have earned accreditations from national organizations that perform in-depth audits to ensure patients receive the very best care. We are proud of our accomplishments and are pleased to offer nationally-recognized quality care to our neighbors in Upstate South Carolina.
