

Hepatitis B Consultation Form Must be completed and returned to Student Health

Student Name: Date of Birth: VCOM Campus and Class: Primary Care Physician: Specialist Consulting Physician: Date of Specialist Consult: Pertinent HBV history prior to consultation (to be completed by student, PCP or VCOM student health) 1. Initial Hepatitis B Vaccination Series dates	Specialist consultant to complete the following section Testing 1. HBV Viral load: (date) 2. Other pertinent testing performed Treatment Recommendations
 a. Immunization 1: b. Immunization 2: c. Immunization 3: d. Titer result and date: 2. Second Hepatitis B Vaccination Series dates a. Immunization 1: b. Immunization 2: 	Follow up Recommendations The student should follow up with me / their primary care physician (circle one) on(not to exceed one year).
c. Immunization 3: d. Titer result and date: 3. HBV Testing a. HBsAg: Positive NegativeDate b. Anti HBc Positive NegativeDate c. HBV Viral Load (if done)Date	At this time, I recommend that this student: Be able to participate in patient care with no restrictions on procedures performed (student may participate in both Category I and Category II procedures – see page 2 for reference) Be able to participate in patient care but should be restricted from performing any Category 1 procedures at this time Other (please describe):
Physician's SignatureDO, MD Address Office Phone Number Print Last Name Date	

Category I Procedures

- 1. Those known or likely to pose an increased risk of percutaneous injury to a health-care provider that have resulted in provider-to-patient transmission of HBV
- 2. Are generally limited to:
 - a. Major abdominal, cardiothoracic, and orthopedic surgery
 - b. Repair of major traumatic injuries
 - c. Abdominal and vaginal hysterectomy
 - d. Caesarean section
 - e. Vaginal deliveries
 - f. Major oral or maxillofacial surgery.
- 3. Techniques that have been demonstrated to increase the risk for health-care provider percutaneous injury and provider to patient blood exposure include:
 - a. Digital palpation of a needle tip in a body cavity and/or
 - b. The simultaneous presence of a health care provider's fingers and a needle or other sharp instrument or object (bone spicule) in a poorly visualized or highly confined anatomic site
- 4. Students with HBV infection <u>may be restricted from performing Category I procedures based on recommendations from an Infectious Disease specialist or based on hospital or preceptor policy.</u>

Category II Procedures

- 1. All other invasive and noninvasive procedures.
- Pose low or no risk for percutaneous injury to a health-care provider or, if a percutaneous injury
 occurs, it usually happens outside a patient's body and generally does not pose a risk for provider
 to patient blood exposure.
- 3. Procedures include:
 - a. Surgical and obstetrical procedures that do not involve the techniques listed for Category I
 - b. The use of needles or other sharp devices when the health-care provider's hands are outside a body cavity (e.g., phlebotomy, placing and maintaining peripheral and central intravascular lines, administering medication by injection, performing needle biopsies, or lumbar puncture)
 - c. Dental procedures other than major oral or maxillofacial surgery
 - d. Insertion of tubes (e.g. nasogastric, endotracheal, rectal or urinary catheters
 - e. Endoscopic or bronchoscopic procedures
 - f. Internal examination with a gloved hand that does not involve the use of sharp devices (e.g. vaginal, oral, and rectal exam)
 - g. Procedures that involve external physical touch (e.g. general physical or eye examinations or blood pressure checks).
- 4. Students with HBV infection are <u>generally not restricted</u> from performing Category II procedures.
