Ophthalmology Opportunity in Blacksburg, VA

Overview

We are a **NON-private equity** practice that due to practice growth in addition to practice acquisition, have an opportunity for an excellent ophthalmologist (comprehensive or fellowship trained in oculoplastics, cornea, uveitis, pediatrics or glaucoma) to join our practice. Both **part-time or full-time** opportunities with **potential for partnership** are available. We are looking for someone with strong ethics and with good medical, surgical and interpersonal skills.

Location:

The main office is at the **desirable location** of Blacksburg, VA (**home to Virginia Tech University**). Blacksburg has repeatedly been **ranked as number one city in the country for raising children** due to its positive and healthy atmosphere and good schooling and easy living for parents and children. Easy access to Virginia Tech offerings such as top coaches for kids sports, arts, science and lecturers, events for kids make it a place that kids can thrive.

Blacksburg is also a cycling destination and has easily accessible hiking, boating, and other outdoor activities due to its mountains, rivers and lakes. We enjoy four seasons with a mild winter and mostly sunny skies. Blacksburg and the surrounding areas are simply beautiful and people have been moving to the area specially to retire given their good experiences when they were exposed to Virginia Tech earlier in their lives.

Virginia Tech University provides for entertainment with team sports, courses, art performances, exhibitions, lectures and more.

Our **office is spacious, newly renovated**, and has natural light.

Equipment/Surgery Center:

We may use any of 3 surgery centers near us. The surgery center we use the most is efficient and has fun and friendly staff which make the surgery day enjoyable for the surgeon and the patients. There is potential for buy in to other surgery centers. Two of surgery centers have access to surgical lasers. Our office has OCT, SLT, Argon, YAG, visual files, topography, A scan, Haag Streit slit lamps and more. We are open to purchasing other equipment.

Pay and Benefits:

We offer a competitive pay and benefits package with opportunity for bonuses and partnership. Benefits may include health, dental, disability, CME, IRA, PTO, organization dues and more.

Patient Demographics:

Each area has a certain kind of patient demographics. Having worked in different parts of the country, we can tell you that our **patients are polite, kind and easy to get along with** and care for. Word of mouth carries you far here. There is a need for a good ophthalmologist and we have a large patient base with room for expansion with the added doctor. There is much opportunity to expand your patient base here. Currently our doctor is a very busy fellowship trained glaucoma specialist who sees both glaucoma and comprehensive patients. We have a good bit of patients who choose premium IOLs.

We look forward to hearing from you and hope to make a decision within the next 2 months for start time any time from 6-11 months from now. If you are interested please **call us** and let us now.

Office: 540-552-1120

If after hours then press the emergency option to connect to our main doctor's cell phone
