- Three professional letters of recommendation
- Certificate of residency completion will be required upon acceptance into the program

ABOUT US

Since 2004, the Sports Medicine program at VCOM has been producing physicians with state-of-the-art educational programs.

Through a partnership with the Virginia Tech Athletic Department, we train physicians for the unique task of providing world-class care to athletes of all ages.

VCOM-Virginia Tech PRIMARY CARE SPORTS MEDICINE FELLOWSHIP

n our program, sports medicine fellows apply osteopathic principles in the evaluation and treatment of athletic patients while working with athletic trainers, orthopedic surgeons and other providers to create a holistic, comprehensive, and team approach to the management of the patient.

An evidence-based approach is used to benefit the athlete patient as well as to promote wellness and provide a supportive rehabilitative environment.

Our program includes four positions at VCOM-Virginia and two positions at VCOM-Auburn, allowing us to train fellows in two NCAA Power Five athletic conferences.

"Here, I'm not just a fellow; I am a member of the sports medicine team."

- Audra Ramsey, DO 2014-15 Fellow

Our unique collaborations enable us to offer all fellows extraordinary training opportunities including:

- 18 Virginia Tech Varsity Sports
- 31 Virginia Tech Club Sports
- Radford University Varsity Sports
- High School Outreach at five local high schools
- Minor league baseball with the Pulaski Yankees

Sports medicine fellows will be highly active in teaching as well; clinically, with resident and student rotators and as teaching faculty in Primary Care Skills and OMM labs for first- and second-year students.

hrough our collaboration with the athletic and biomechanical engineering departments at Virginia Tech, VCOM Sports Medicine faculty continue to be at the forefront of the national conversation regarding concussion in sports, providing fellows with a vibrant clinical research environment where they can develop the skills to become lifelong researchers as well as physicians.
